BBC produces

Tapered filament with the best of the quality and innovative technologies. Our tapered filament provides you with higher cleaning power and gum can be massaged with softness by Super-thin tapered Filaments.

- Brushing with softness
- Boosting effect of plaque removal
- Reducing gum stimulation

Types of filament

Single-Taper

While brushing with one side of tapered, functions of Tapered and non-tapered filaments are provided at once. In other words, its single tapered has the features of Nylon and Tapered filament. Hence, the feature of Nylon from non-tapered part and the softness from tapered side are provided as dual function of filaments.

Double-Taper

While brushing with both sides of tapered, the super-thin tips clean gum line and inter-teeth deeply, but don't stimulate gum strongly thanks to remarkable softness from the ends of both tips.

Pureflex[®]

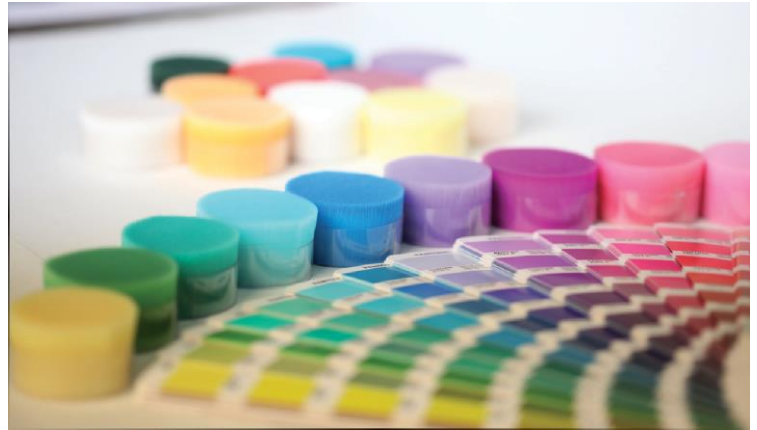

Pureflex®

Pureflex has various colors.
Color of the filament can be matched with Pantone code.
Customized filament is available with safety certifications.

Product Specification

Diameter	0.05 mm ~ 0.25 mm
Tapering type	Single / Double / Non-Tapered
Package	BBC standard / special requirement is available

*Customized specification on request

Innoflex® additives

Design your own filaments

The Filaments with Innoflex additives are able to increase value of your products.

Additives for Filaments

Product line

Antibacterial Filament

- Silver Ion
- Nano Silver

Precious Materials

- Nano Gold
- Platinum
- Jade (Nephrite)
- Tourmaline

Natural Sources

- Black / White Pearl
- Salt
- Tea
- Charcoal- Xylitol

Others

- Calcium carbonate
- Sodium Bicarbonate
- Fluorine
- Etc.

Product Specification

Diameter	0.05 mm ~ 0.25 mm
Tapering type	Single / Double / Non-Tapered
Package	BBC standard / Special requirement is available

*Customized specification on request

Spiral Filaments

- Twisted filament with spiral cross section, with or without different colored edge.
- The twisted filament could boost the cleaning power with fancy colors.

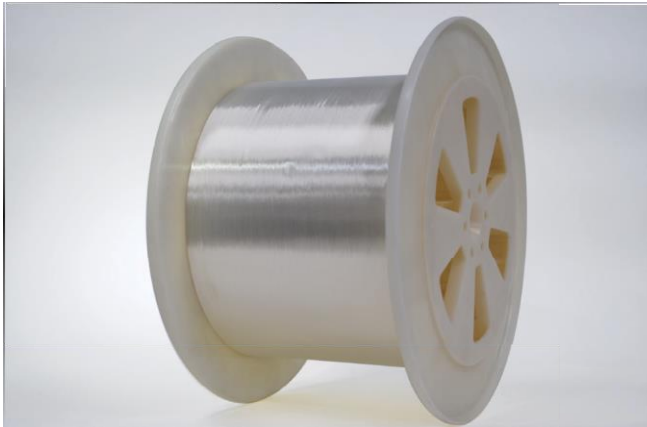

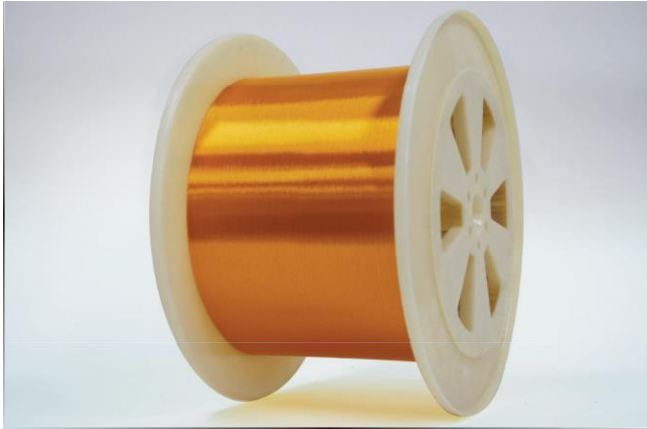

Product Specification

Diameter	0.05 mm ~ 0.25 mm
Tapering type	Single / Double / Non-Tapered
Package	BBC standard / Special requirement is available

*Customized specification on request

Filaments for Interdental Brush

- Available to add various concepts and additives for Interdental Brush
- Vivid and multi colors to meet many concepts

Product Specification

Diameter	2mil ~ 4mil
Strand	50, 75, 100, 150, 200, 225
Package	BBC standard / Special requirement is available

*Customized specification on request

Arumflex[®]

for cosmetic filaments

Arumflex®

Filament for Beauty and it can be designed to meet various purposes of cosmetic brushes.
